

# THE PUNCHLINE

UNIPUNCH PRODUCTS, INC.

*Punching and Notching  
without Presses*

+

= a formula for increased productivity

## Turn-key Systems

### Need to stay lean and improve your efficiency?

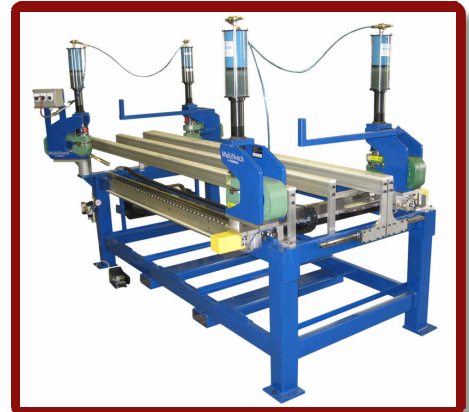

You can with the combination of UniPunch modular tooling powered by reliable Multicyl® air over oil cylinders. Use in stand-a-lone systems or in conjunction with your work cells for punching holes, notching, shearing or blanking operations to produce parts *fast - without presses*. More information on Multicyl products can be found at [www.multicyl.com](http://www.multicyl.com).

A Basic single station Multicyl cage / cylinder incorporating UniPunch tooling with up to 7 ½ tons of punching force.

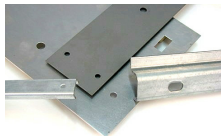

Cantilever style gang punching system for straight line hole applications. Shown here with UniPunch B-series tooling

Custom flexible turn-key systems designed to handle various part sizes. Our engineers can develop a complete system for your specific hole punching or notching application. Send us your part drawings for a prompt quotation.

## A Sampling of parts and applications produced with UniPunch powered by Multicyl....

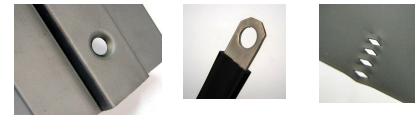

Flat & Formed Part  
Punching

Tube & Pipe  
Punching

Corner, Edge & Vee  
Notching

Custom Applications  
Countersink - End Trim - Thread Loop

For a tooling quotation, just provide drawings or CAD files.  
Our engineering department will review your requirements and recommend tooling for your application.
